

GO BACK TO MOVE FORWARD

A high school education
or equivalency (and beyond)
improves quality of life!

Why is it important to complete high school and gain additional education?

According to Research:

- Graduating from high school will determine how well you live for the next 50 years of your life. On average, those with a diploma earn \$746 a week. Getting a Bachelor's degree increases average earnings to \$32,000 a year.
- 24.7% of people without a high school diploma live in poverty.
- High school graduates are more likely to live in a low crime rate neighborhood and less likely to have trouble with the law. The National Dropout Prevention Center states that 80% of prisoners in the U.S. are high school dropouts.
- In 2020, 66% of jobs required a post-secondary education.
